

# PETITION TO KEEP THE NATIONAL ENERGY BOARD IN CALGARY

*Whereas the National Energy Board is located in Canada's top energy-producing province, where top engineers, scientists, technicians and other industry experts are on the forefront of groundbreaking research and the latest developments in the sector; whereas moving the National Energy Board to Ottawa would mean moving away from the experts and towards politicians and lobbyists; whereas such a move would cause severe consequences throughout the energy sector and Canada's broader economy killing tens of thousands of energy jobs; **we ask the Prime Minister to reverse this rushed, ill-considered plan and keep the NEB in Calgary where it is most effectively placed to make science-based decisions.***
